

Grassroots Discoveries Offer Multi-Million Oz Potential

Four Grassroots Targets Yielding Four New Drill Discoveries

- Most recent: 207m @ 2.68 g/t AuEq at Apollo – New assays coming soon
- From near-surface – 302m @ 1.1 g/t Au/Eq, with visible gold
- From surface - 163m @ 1.3 g/t Au/Eq
- From surface - 710m @ 0.53 g/t Au/Eq

About Us

Rapidly advancing, large scale gold-copper-silver-moly porphyry and breccia targets with related high-grade vein systems in the mining-friendly department of Caldas in Colombia.

Investment Highlights

- Fully-funded for 2022, including 4 drill rig, 20,000+ metre drill program.

- High-grade, long interval from Apollo target:
- 207.15m @ 2.68 g/t AuEq
- Assays pending with results released regularly

APC-1 - Apollo

- Guayabales Project situated next to historical and current multi-million ounce gold resource.
- Flagship Apollo target yielding long intercept, high-grade results allowing for multi-million oz potential.
- >75% of projects remain unexplored.

Common Shares Outstanding	47.9M
Stock Options	3.3M
Fully Diluted Shares Outstanding	51.2M
Cash*	US\$8.3M

*As of June 30, 2022

Quick Facts

Management: Management team has had previous success with Continental Gold (sold to Zijin Mining for \$2 billion (EV) in March 2020).

Location: Guayabales project is situated contiguous and immediately along strike of Aris Gold's multi-million-ounce deposit.

Country: Mining is a key pillar of growth in Colombia with support from governmental agencies at all levels.

Infrastructure: Widely available, modern, first-world transportation links, communications and electricity.

Well-Financed: Fully-funded plan to carry out extensive 4 rig, 20,000+m exploration program through 2022.

ESG: Well-rounded program benefiting stakeholders at all community and governmental levels.

TSX.V:CNL | OTCQX:CNLMF

Guayabales Project

Apollo target: Drilling ongoing with 4 rigs and assays pending.

Recently-announced:

- 207.15m @ 2.68 g/t AuEq
- 180.6m @ 2.43 g/t AuEq
- 268.0 @ 1.50 g/t AuEq
- 17.5m @ 12.79 g/t Au, 21 g/t Ag

Drill assay results to be released regularly through year-end.

Olympus target: Phase 2 drilling complete.

Results from phase 1 include:

- 301.9. at 1.11 g/t Au Eq. from near surface, with visible gold
- 116.3m at 1.03 g/t Au Eq. with visible gold

Donut Target: Drilling to resume in 2023.

Results from phase 1 include:

- 104m at 1.3 g/t Au Eq. from surface
- 106m at 0.5 g/t Au Eq. from Surface

San Antonio Project

Pound Target: Porphyry-related breccia and polymetallic veins. Phase 1 drilling yields **significant discovery**.

Results include:

- 710m at 0.53 g/t Au Eq
- 750m at 0.41 g/t Au Eq

COP Target: Porphyry target remains untested by drilling.

Next steps:

High resolution, deep penetrating IP survey analysis currently **underway**.

- **Phase 2 drilling** to commence in **2023**.
